us epa oa 2004-0006
frl 7816-7

epa icr no 2160-01

little is known about how public values reuction in
risk to health of their children????????? what a
ridiculous question to be asking.

there is nothing so precious to a parent as their
children.

Except for a deranged parent, but then we do not want
to let deranged people make our laws.

why does this question even have to be asked.

i think it is negligent to spend taxpayer dollars to
ask this stupid question, which is clear to any u.s.
citizen.
